

A medical professional in a white coat is shown from the chest up, holding a stethoscope. The background is a blurred clinical setting. Overlaid on the image is a digital graphic of a human brain with a network of glowing red nodes and lines, suggesting a focus on neuroscience or digital health. The overall color palette is a cool blue-grey.

2,800,000

Americans sustain a Traumatic Brain Injury annually

41%

Moderate-Severely injured patients lack follow-up visits within
3 months

2%

Physicians' time communicating w/ patients

A blue-tinted background image showing medical professionals in white coats gathered around a laptop. The laptop screen displays a brain scan with a network of red nodes and lines, symbolizing neural connectivity. A stethoscope is visible on the laptop. The overall scene suggests a collaborative medical discussion or research analysis.

TBI Symptoms management needs to change

ReLeaf is Simple

ReLeaf is a remote patient monitoring system that tracks traumatic brain injury symptoms

Releaf is Solving Unmet Needs

At-home check ins

**Enhanced Doctor
Patient Interaction**

**Improved
treatment
outcomes**

Real Traction with Real Users

TBI Patient A

*I'm **really enjoying** doing this...the check-ins and reminders were excellent...Thank you for **helping bring a new clarity!***

17

User Interviews
